

Specification for approval

Description (产品类型) : Power Module

Customer P/N (客户) : _____

ZETTLER P/N (赛特勒) : APX05S0300WP-200

Revision (版本号) : PD1.0

Drafted (编制) : Honghua Luo

Checked (审核) : Xianzhi Xie

Approved (批准) : Aaron Chen

PD1.0	2025/05/22	Initial release	Honghua Luo
Rev.	Date	Description	Approved

Approved by Customer (客户确认) : _____

Friendly Reminder: Please help to sign this Spec when approve , and fax to our company . Or else, we will consider you have accepted it and make future order based on this Spec.

友情提示:请在签字确认后,按封面的传真号码回传给赛特勒磁电有限公司.如无回传,则视为默认,后续的相关订单将以按本承认书的规定为技术要求

External recommended components selection guide (No EMC devices)

注:

- EC1/EC2 is used as filter capacitor with AC input (must be connected externally) and as EMC filter capacitor with DC input (must be connected), External recommended to use the capacitor with ripple current $>200\text{mA}@100\text{KHz}$.
- R11/R12/R13/R14 used as voltage equalizing resistors for EC1/EC2, which must be externally connected. It is recommended to use surface mount resistors with a resistance greater than $1\text{M}\Omega$ and a specification of 1206 or higher.
- We recommend using an electrolytic capacitor with high frequency and low ESR (ESR of C2 at low temperature of $-40^\circ\text{C}\leq 1.1\Omega$) rating for C2. Choose a capacitor voltage rating with at least 20% margin, in other words not exceeding 80%. C1 is a ceramic capacitor, used for filtering high frequency noise.
- A suppressor diode (TVS) is recommended to protect the application in case of converter failure and specification should be 1.2 times of the output voltage.

Electromagnetic Compatibility Solution--Recommended Circuit

1. Application circuit 1——Basic application (Immunity Level 3, Emissions Class A)

Component	R1	L1	R2	CY1, CY2	FUSE
Spec.	10K/1206	0.5~2mH/0.5A	12Ω/3W	100~2200pF/400VAC	1A/400V

Note:

1. R2 is the input plug-in resistor, this resistor needs to be a wire-wound resistor (required).

2. In the home appliance application environment, the two Y capacitors of the primary and secondary need to be externally connected.

2. Application circuit 2: Universal system recommended circuits for outdoor general environment (Immunity Level 4, Emissions Class B)

Component	MOV	R1	CX	L1	R2	CY1, CY2	FUSE
Spec.	14D751K	10K/1206	0.1UF/480VAC	0.5~2mH/0.5A	12Ω/3W	100~2200pF/400VAC	1A/400V

Note:

1. According to the certification requirements, the X capacitor needs to be connected in parallel with the bleeder resistance, the recommended resistance value is less than 3.8MΩ, and the actual need to be selected according to the certification standard.

2. R2 is the input plug-in resistor, this resistor needs to be a wire-wound resistor (required).

3. In the home appliance application environment, the two Y capacitors of the primary and secondary need to be externally connected.

3. POWER DERATING (降额功率曲线图)

NOTE: With an AC input between 85~100VAC and a DC input between 70~120VDC, the output power must be derated as per temperature derating curves.
